Domiciliary Care

Delivering care to you in your own home. A member of our staff will visit you in your own home (your present home or an extra care apartment).

We will help you with any daily activities you cannot safely manage on your own (getting dressed; washing around the house; going to the toilet). How often they visit and for how long each visit lasts, depends upon an assessment of your needs.

Live In Care

Our care workers can help you to live independently. We provides home care services to disabled undergraduates studying at university as well as to older people who prefer to stay independent and living in their own homes for as long as possible.

Whether you just need some companionship or you have some specific health issues, we will provide a realistic and affordable alternative to moving into a care home, including; full time live-in care, 24 hour care.

Respite Care

We provide temporary relief to those who are caring for family members, who might otherwise require permanent placement in a facility outside the home.

We would provide this service in your own home if your Carer goes on holiday. We can also do this in your own home allowing your Carer some time for a break.

End of Life Care

We will work with your nurses (Macmillan, Hospice at Home), GP and other professionals to support you during your life journey.

We will work with you in a person centred way to allow you to live at home as long as possible.

Care Services

We are here to help you find the best solution for you to ensure that all your needs are met.

Tailored Care Packages

Our care packages are tailored around you and with you in mind. Our main aim is to ensure that you live a good quality of life.
